

# Digital Seva

## Wallet Pin Creating Process

CSC eSign services are now live for the VLEs

It is advised to use Mozilla Firefox with the latest version for performing transactions on Digital Seva Portal. It is important for you to know that Google has deprecated the use of TLS 1.0 and 1.1 as a result of known vulnerabilities, but some of our merchants are still using the support for TLS 1.0 & 1.1 because of which there might be challenges while making payments, top-ups, transactions etc. Therefore, if you are running an older browser, you need to enable the browser's TLS 1.2 protocols and use Mozilla Firefox for better convenience.
