Step 5b : If sync got success then you will get the below image as the success response.

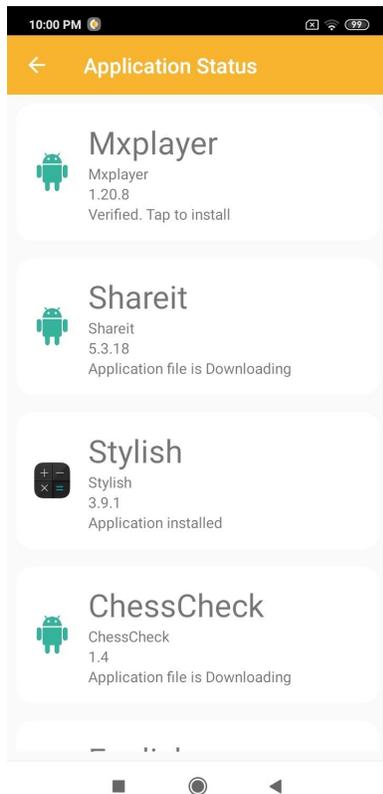

Step 6: You click the menu button, In the bottom right of the application you can see the screen like below.

You have three options like App Status,Info and Wifi.

Step 7: If you click the app status button it will be there like below screen. This menu is used to show the application status those pushed by admin.

Verified. Tap to install -> Application ready to install automatically.

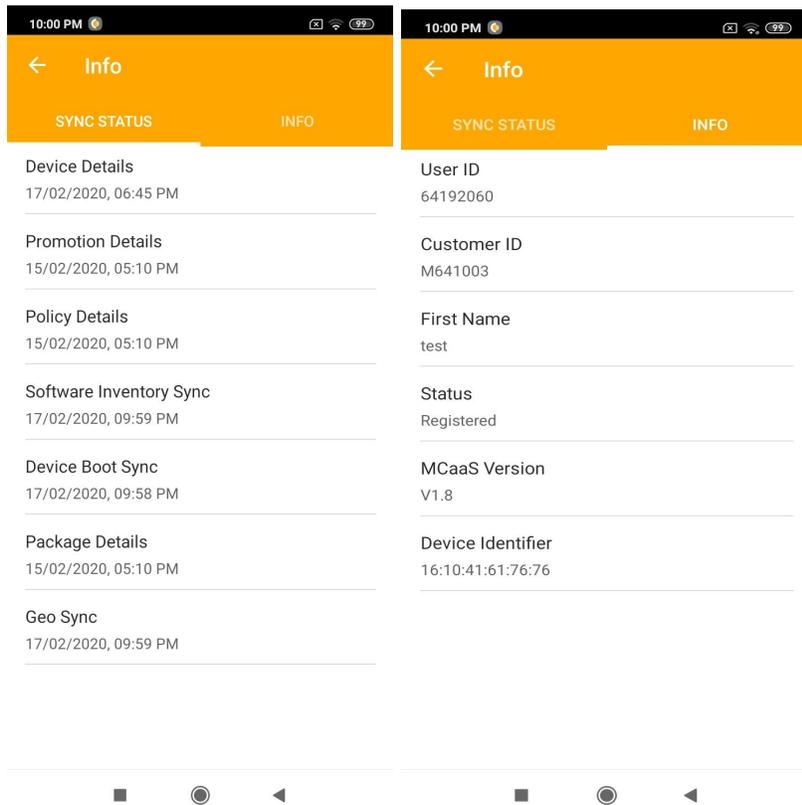

Application file is Downloading -> Application is downloading in the background.

Application installed -> Application installed successfully in your device.

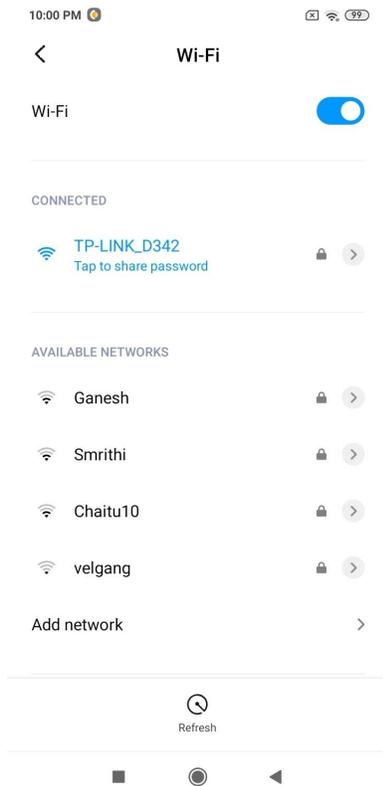

Step 8: If you click the Info button the screen will be like in the below screen.

In the **left side screen** shows the details of sync status.(Like which time your sync of process completed or your last sync)

In the **right side screen** shows the details of your application information.

Step 9: If you click the Wifi button it goes to the wifi setting from our application directly.

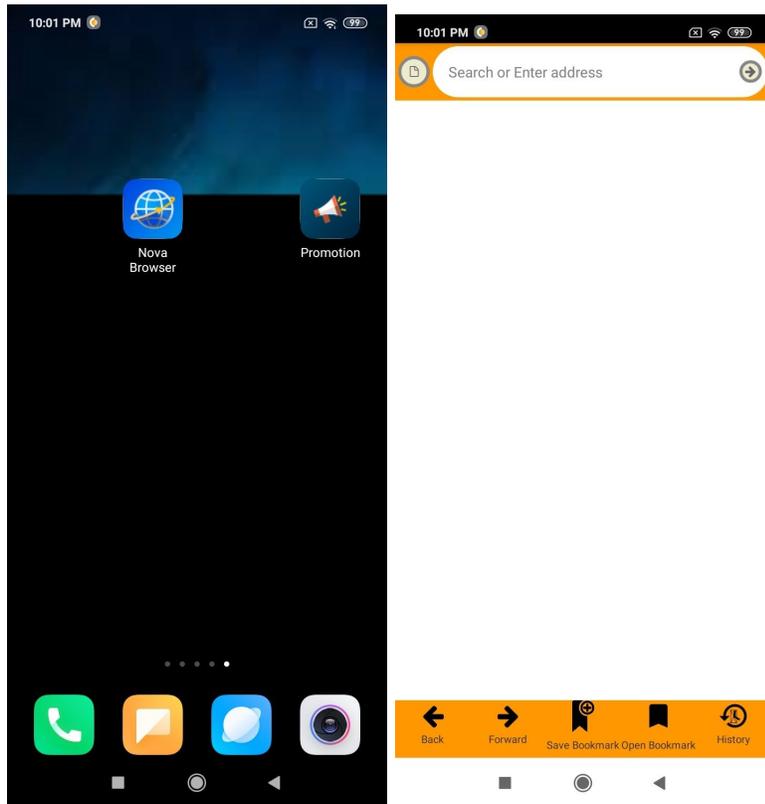

You can use wifi from here.

**You have two inbuilt applications in Our MCaaS. Nova Browser and Promotion.
You can use our nova browser for browsing purposes.**

Step 10: If you click the Nova Browser Icon it shows the screen like below.

On your left side you can see the Nova Browser Application. If you click the Application. You can see the right side image in your mobile. Then you can browse and use it as a browser.

All the features are there in the nova browser like bookmarks, history, back and forward and new tab etc...

It is user friendly compared to the other browsers.

Step 11: If admin push the banner or ticker those files are there in the promotion application. You can see those files from here.

On the left side you can see the Promotion application on your mobile. If you click the Application. You can see the screen like your right side images.

Banner: If admin push any banner you can see the banner with the details and images.

Ticker: If admin push any tickers you can see the tickers with details. If any link is attached you click the link and it redirect the link from here. Then you can see the details.
